

PRESS RELEASE

Jürgen Hansjosten leaves InfraFibre Germany

Unterschleissheim, 19 February 2025 - Jürgen Hansjosten, CEO of InfraFibre Germany (IFG), will leave the company at his own request at the end of March 2025. The successful acquisition of IFG by Unsere Grüne Glasfaser (UGG) has created one of Germany's largest independent fibre optic infrastructure providers. Jochen Mogalle and Richard Fahringer will take on the role of Managing Directors for InfraFibre Germany from April. Both are already members of IFG's Group Management Team and will take over Hansjosten's previous responsibilities.

'After a successful time as CEO, it's time to pass on the responsibility. I am proud of what we have achieved and would like to thank the entire IFG team for their commitment and passion. Without the entire team, none of this would have been possible,' says Hansjosten and adds: 'Together with InfraFibre, UGG will significantly increase its impact in the realization of fiber optic projects. As an internet provider, InfraFibre also brings a great product portfolio with the LEONET and toni brands, which expands the range of services for consumers on the UGG network.'

As CEO since 2019, Hansjosten has shaped the course of InfraFibre Germany in 2021, and developed it into one of the leading, self-economically expanding fiber optic infrastructure providers in southern Germany. Jochen Mogalle and Richard Fahringer will take over the role of Managing Directors for InfraFibre Germany GmbH from April.

'I would like to thank Jürgen Hansjosten for his tireless efforts and wish him all the best for the future and every success with the challenges ahead,' says Jens Prautzsch, CEO of Unsere Grüne Glasfaser. The integration of InfraFibre Germany into UGG is progressing at full speed.

'Together, we will continue to drive forward digitalization in Germany and connect a maximum number of households to the fiber optic network.'

With the acquisition of InfraFibre Germany by UGG, the joint venture between Allianz and the Telefónica Group has become one of Germany's largest independent fibre optic infrastructure providers. Together with the IFG companies, rural regions of Germany are supplied with high-performing fibre optics. UGG and InfraFibre Germany are currently active in eight federal states.
